

## ***For Immediate Release***

### **IIJ Cloud Web Hosting Service Registered with ISMAP**

TOKYO - January 9, 2024 - Internet Initiative Japan Inc. ("IIJ", TSE Prime: 3774), one of Japan's leading Internet access and comprehensive network solutions providers, today announced that its web hosting service IIJ Cloud Web Hosting Service was registered on December 25, 2023, on the ISMAP Cloud Service List as a service meeting the security standards of the Information system Security Management and Assessment Program (ISMAP) for government information systems.

ISMAP is a program designed to have cloud services assessed and registered in advance as meeting the security requirements of the Japanese government so as to ensure a level of security and facilitate smooth introduction in government procurement of cloud services. In principle, governmental organizations procure cloud services from those registered on the ISMAP Cloud Service List.

IIJ Cloud Web Hosting Service is a web hosting service for businesses that is suitable for corporate websites and public websites. It offers web service platforms focusing on stability as well as enhanced countermeasures against information leakage and suspension of websites. Because it is now registered on the ISMAP Cloud Service List and thereby meets the security assessment standards for government information systems, customers can operate websites with a greater sense of security.

IIJ will continue to facilitate use of cloud services for government information systems and other customers in the public and private sectors as well as strive to keep enhancing service quality to provide increasingly secure and highly reliable cloud services.

#### **About IIJ**

Founded in 1992, IIJ is one of Japan's leading Internet-access and comprehensive network solutions providers. IIJ and its group companies provide total network solutions that mainly cater to high-end corporate customers. IIJ's services include high-quality Internet connectivity services, systems integration, cloud computing services, security services and mobile services. Moreover, IIJ has built one of the largest Internet backbone networks in Japan that is connected to the United States, the United Kingdom and Asia. IIJ was listed on the Prime Market of the Tokyo Stock Exchange in 2022.
