

**IIJ Global Solutions Indonesia to Begin Offering Starlink High-Speed Internet**

*-- IIJ Global Solutions Indonesia to begin providing satellite broadband communication services as an Authorized Starlink Reseller in Indonesia --*

JAKARTA - July 30, 2025- Internet Initiative Japan Inc. (TSE Prime: 3774) and its Jakarta-based 100% owned subsidiary PT. IIJ Global Solutions Indonesia today announced that PT. IIJ Global Solutions Indonesia (headquarters: Jakarta; President: Tokuo Nobuhiro; hereinafter, IIJ GS Indonesia) is an Authorized Starlink Reseller and will begin offering Starlink within Indonesia in July 2025. Starlink is the world's first and largest satellite constellation using low Earth orbit to deliver broadband internet capable of supporting online gaming, video calls, and more.

Indonesia is comprised of approximately 17,000 islands, and there are significant geographical and economic constraints when it comes to establishing optical fiber networks and mobile phone networks throughout the country. As a result, Indonesia is one of the ASEAN countries with the lowest penetration rates for fixed broadband and mobile communications. For that reason, there is a growing need for satellite broadband communications as a reliable means of connectivity that can be used on remote islands and in rural areas.

IIJ GS Indonesia has a history of providing comprehensive IT support for Indonesian and Japanese customers by offering security services and other IT services as well as installation support, system integration, and operation and management services. By becoming an Authorized Starlink Reseller in order to expand its coverage area for Internet connectivity services, it will be able to offer IT services to a wider range of business and enterprise customers and provide more comprehensive support for network environments. Additionally, by using Starlink services as backup connections, it can construct network environments with improved availability. In particular, by using Starlink in combination with Safous, its remote privileged access management service, customers will be able to establish links to facilities in locations where communication networks have not been fully deployed, improving productivity and facilitating more reliable business development.

IIJ GS Indonesia will continue to contribute to community development by deploying services that meet the diverse needs of customers in Indonesia.

**About IIJ Global Solutions Indonesia**

IIJ Global Solutions Indonesia is an Indonesian subsidiary of the IIJ Group that was established in January 2015. The company is developing a business related to networking and outsourced services, and it provides a variety of cloud services, including security services. In addition, the company is currently developing a cloud service called Biznet GIO Cloud through PT. BIZNET GIO NUSANTARA, which is a joint venture with Biznet Networks (official name: PT. Supra Primatama Nusantara), a major local telecommunications services company.
